

TREASURE VALLEY GROWN  
FARM SEEDS

**2010 BERRIES AND MORE**

**STRAWBERRIES**

Cultivar	Season	Description
Fern	Everbearing	Always has a fruit in different stages of development. Large, very firm, sweet berries.
Quinalt	Everbearing	An old time favorite. A medium sized, firm berry, with excellent flavor.
Shuksan	Spring	Late, extra hardy, recommend for colder areas. Tolerates alkaline soils.

**RASPBERRIES**

Cultivar	Season	Description
Autumn Britten	Everbearing	Very large, firm fruit that is flavorful
Canby Thornless	Spring	Large, good flavored, bright red berry. Has a good shelf life.
Caroline	Everbearing	Larger berry than Heritage and is more productive, with a rich, full intense flavor.
Fall Gold	Everbearing	Large, conical, non-crumbling, very sweet, soft, berries. Great for processing and fresh eating.
Heritage	Everbearing	Large, sweet, dark red berries with a mild flavor.

**BLACKBERRIES, PURPLE & BLACK RASPBERRIES**

Cultivar	Description
Black Raspberry 'Munger'	Midseason bearer. Large, plump yet firm, shiny black berries.
Purple Raspberry 'Royalty'	Large, firm, round, very sweet purple berries.
Blackberry 'Chester'	Thornless, large, sweet, high quality berries with good flavor.
Boysenberry 'Thornless'	Good producer, easy to trellis.
Marionberry	Berries are large, bright black with excellent flavor. All purpose, has very small seeds.

**BLUEBERRIES**

Cultivar	Description
Berkeley	Midseason. Open, loose clusters of large, firm, blue fruit. No cracking. Good in desserts.
Bluecrop	Midseason. High quality fruit with good sub acid flavor. Good for fresh eating, preserves, baking and freezing.

## CURRANTS AND GOOSEBERRIES

Cultivar	Description
Primus White Currant	Heavy producer. Flavor is the sweetest of currants. High in Vitamin C.
Red Lake Currant	Large, dark red berries on med-lg clusters. Excellent for jellies, preserves and muffins.
Poorman Gooseberry	Berries are the largest of any American variety, pink, and best table quality.

## ELDERBERRIES

Cultivar	Description
Nova	Large, sweet, blue fruit. Ripens evenly and a bit earlier than 'York'. Easy care, large shrub. Pollinate with 'York'.
York	Juicy, sweet, purplish-black berries. Large creamy white flowers in spring. Pollinate with Nova. Easy care, large shrub.

## RHUBARB

Cultivar	Description
Crimson Cherry	Reddest variety. Tends to be red all the way thru. Best commercial variety in the pacific northwest.
Victoria	Color variation between green and red. Red appears first, then turns green with sunshine. Tends to grow seed stalks on an annual basis.

## ASPARAGUS

Cultivar	Description
Jersey Knight	A patented male hybrid with very few female seed plants, which are commonly found in open pollinated varieties. Reported to have excellent fusarium tolerance and high resistance to rust. Male plants don't expend energy producing seed and tend to be more vigorous than female plants.
Mary Washington	The standard commercial strain and the most popular US variety is resistant to some rust and blight, has a 6 week cutting season. Produces long straight spears with tight tips. Crowns are long lived and well adapted to the northwest. It is the hardiest asparagus strain we have test gardened. Prefers sweet soil with a pH of 6.8 to 7.2.
Sweet Purple	This new type of asparagus has many similar characteristics to green asparagus but offers something new for the asparagus connoisseur. The spears produced have several qualities which make it quite different from the common green varieties: deep-burgundy coloration is a striking difference, this type has 20% more sugar which allows it to commonly be eaten raw, and the spears are generally larger and more tender than that of its green counterpart which allows the cook to use the entire spear with little waste.

## HORSERADISH

Large, coarse leaved plant grown for its large white roots, which are peeled, grated, and pureed with vinegar or cream to make a condiment. The taste is similar to wasabi or Chinese hot mustard. Harvest sections of roots from the outside of the root clump through fall, winter, and spring, as you need them to ensure a fresh tangy taste.
