

TREASURE VALLEY GROWN  
FARM SEEDS

**2012 BERRIES AND MORE**

**STRAWBERRIES**

Cultivar	Season	Description
Aromas	Everbearing	Characterized by its exceptional fruit quality. Very good flavor. Large fruit sizes.
Tri Star	Everbearing	A good variety for hanging baskets, and is adapted to a variety of climates.
Shuksan	Spring	Late, extra hardy, and tolerates alkaline soils.

**RASPBERRIES**

Cultivar	Season	Description
Canby Thornless	Spring	Large, good flavored, bright red berry with a good shelf life.
Caroline	Everbearing	Larger berry than Heritage and is more productive, with a rich, full intense flavor.
Heritage	Everbearing	Large, sweet, dark red berries with a mild flavor.
Fall Gold	<b>SOLD OUT!</b> Everbearing	Large, conical, non-crumbling, very sweet, somewhat soft, golden berries.

**BLACKBERRIES, PURPLE & BLACK RASPBERRIES**

Cultivar	Description
Black Raspberry 'Munger'	Ripens mid-season. Large, plump yet firm, shiny black berries.
Blackberry <b>SOLD OUT!</b> 'Chester'	Thornless, large, sweet, high quality berries with good flavor.
Blackberry 'Prime Ark 45'	Highest rates flavored Primocane blackberry. Fruit same year you plant.
Boysenberry 'Thornless' <b>SOLD OUT!</b>	Good producer, easy to trellis.
Marionberry <b>SOLD OUT!</b>	Berries are large, bright black with excellent flavor. All purpose, has very small seeds.
Loganberry <b>SOLD OUT!</b>	Berries are long, large, dark red, acid and highly flavored.
Tayberry	Berries are large and a reddish purple color with excellent, aromatic flavor.

**BLUEBERRIES**

Cultivar	Description
Patriot <b>SOLD OUT!</b>	Early, large fruit, heavy producer, clusters like grapes.
Bluecrop <b>SOLD OUT!</b>	Midseason. High quality fruit with good sub acid flavor. Fresh eating, preserves, baking, or freezing.
Northblue <b>SOLD OUT!</b>	Early to midseason. Most cold hardy- zone 3. Medium sized berries with rich, sweet flavor.
Toro <b>SOLD OUT!</b>	Midseason. Full, heavy clusters of giant sky blue fruit. Outstanding ornamental blueberry with great flavor.

**WE ALSO HAVE 'PINK LEMONADE', 'SUNSHINE BLUE', and 'JUBILEE'**

## CURRENTS AND GOOSEBERRIES

Cultivar	Description
Crandall Black Currant <b>SOLD OUT!</b>	Berries of large, black currants with a sweet, tart flavor. Excellent for jams, juice & syrup.
Cherry Red Currant	Large, dark red berries with acid flavor. Similar to Red Lake, mildew resistant.
Poorman Gooseberry	Berries are the largest of any American variety, pink, and best table quality.

## ELDERBERRIES

Cultivar	Description
Nova	Large, sweet, blue fruit. Ripens evenly and a bit earlier than 'York'. Easy care, large shrub. Pollinate with 'York'.
York	Juicy, sweet, purplish-black berries. Large creamy white flowers in spring. Pollinate with Nova. Easy care, large shrub.

## RHUBARB

Cultivar	Description
Crimson Cherry <b>SOLD OUT!</b>	Reddest variety. Tends to be red all the way thru. Best commercial variety in the pacific northwest.
Victoria	Color variation between green and red. Red appears first, then turns green with sunshine. Tends to grow seed stalks on an annual basis.

## ASPARAGUS

Cultivar	Description
Jersey Knight <b>SOLD OUT!</b>	A patented male hybrid with very few female seed plants, which are commonly found in open pollinated varieties. Reported to have excellent fusarium tolerance and high resistance to rust. Male plants don't expend energy producing seed and tend to be more vigorous than female plants.
Mary Washington <b>SOLD OUT!</b>	The standard commercial strain and the most popular US variety is resistant to some rust and blight, has a 6 week cutting season. Produces long straight spears with tight tips. Crowns are long lived and well adapted to the northwest. It is the hardiest asparagus strain we have test garden. Prefers sweet soil with a pH of 6.8 to 7.2.
Sweet Purple <b>SOLD OUT!</b>	This new type of asparagus has many similar characteristics to green asparagus but offers something new for the asparagus connoisseur. The spears produced have several qualities which make it quite different from the common green varieties: deep-burgundy coloration is a striking difference, this type has 20% more sugar which allows it to commonly be eaten raw, and the spears are generally larger and more tender than that of its green counterpart which allows the cook to use the entire spear with little waste.

## HORSERADISH

Large, coarse leaved plant grown for its large white roots, which are peeled, grated, and pureed with vinegar or cream to make a condiment. The taste is similar to wasabi or Chinese hot mustard. Harvest sections of roots from the outside of the root clump through fall, winter, and spring, as you need them to ensure a fresh tangy taste.

## HOPS

'Nugget' and 'Mt Hood' are vigorous vines, quickly reaching 20 ft. tall, and thrives on neglect. The greenish-yellow, cone-like flowers smell like beer. It can scramble along the ground or grow up screens and trellises.
